

# One Star, Two Star

One star, two star

Now there's three

The darker it gets the more we see

Four star, five star

Count with me

The night feels bright in your company

The night sky looks dark but I will help you find

The glimmer of light in the dark that shines

The night sky looks dark but I want you to know

They might be far away but the stars still glow, glow, still glow.

Your voice, my voice

Join our song

When we sing together our voice is strong

Tá dóchas fiú sa dorchadas

Ar scáth a chéile a mhaireann muid

The night sky looks dark but I will help you find

The glimmer of light in the dark that shines

The night sky looks dark but I want you to know

They might be far away but the stars still glow, glow, still glow.
